## Experience cutting-edge material technologies that create a pleasant environment

I-Badak is conscious of those of us who spend time in buildings and those with children running around, and we are working day and night to develop flooring materials to maintain their safety and health in any circumstances. Experience the state-of-the-art I-Badak flooring materials, which create more pleasant and comfortable living environments with fire-resistant, quiet, and anti-slip surface technologies.

**Noise reduction** : Rubber tiles markedly reduce the sound of footsteps when compared to flooring made of other materials

**Slip prevention** : Our products are better at preventing slips, falls, and other accidents, and they require no separate installation when constructing stairs.

**Tailored designs** : Our products are available for space presentations suited to consumer preference, and they can be adapted to unique designs.

**Eco-friendly raw materials** : Our products take health and the environment into consideration through the use of eco-friendly raw materials.

# Floor Soft – Rubber Tile

Floor Soft is I-Badak's premier product, born of a focus on product development and rooted in outstanding safety, sound absorption, and durability. Its design is both practical and sophisticated.

- Round 3T/4T
- Round Chip 3T/4T
- Mono 3.5T
- Mono Chip 3.5T
- Sport 6T
- Simple Chip 3T
- Rainbow 3T
- Stair Type  
(Solid, Chip, Rainbow)

## Features & Strengths

- Outstanding non-slip surface
- Excellent footstep noise reduction
- Halogen-free / No emission of toxic gases
- Low VOC / Eco-friendly
- Excellent wear strength / Superior durability

## Applications

- Factories, schools, art galleries, libraries, subways, industrial facilities, power plants, etc.

# Marine Floor Covering – Rubber Tile

Marine Floor Covering is a safe product made from flooring materials that retard the spread of flames and do not emit toxic gases. It has been certified by the international classification organization DNV.

- Round 3T/4T
- Round Chip 3T/4T
  
- Stair Type  
(Solid, Chip)

## Features & Strengths

- I-Badak Rubber Tile has obtained product quality and performance certificates from the DNV.
- Various layouts to suit client tastes are possible with this product, including monochromatic, mosaic, and pattern installations.
- The synthetic rubbers created through thermo compression bonding provide excellent durability and wear resistance.
- The product provides non-slip stability and requires no separate facility in installing stairs.

## Applications

- Floors and stairs on ships

## | Installation manual |

### Step 1

Before installation, draw a central line on the work floor to align the product.

### Step 2

After applying an adhesive to the bottom of the product, affix it to the floor.

### Step 3

Install the product such that it completely bonds with the floor.

### Step 4

After installation, ensure the product completely adheres to the floor by pressing down on it with a heavy object.

## | Installation |

- The installation surface should be smooth, without unevenness or curves. Any cracks in the floor surface should be filled and foreign substances, such as dust, oil, paint, and wax, should be removed in advance.
- The humidity of the surface should be below 4%. If the humidity exceeds 4%, the installation should begin after drying the surface sufficiently.
- The adhesive used for installation must be CR or urethane-based. Tile cleaning using a damp cloth or mop and wax should be done at least 48 hours after the installation.

## | Post-installation maintenance |

- After initial installation, the floor should be washed using a suitable rubber flooring material cleaner.
- After cleaning, the floor should be rinsed using clean water and then dried.
- Depending on traffic, the floor should be cleaned approximately every two weeks, and wax should be applied.
- Depending on the condition of the floor, floor wax should be applied after removal of wax with paint remover approximately every 6 months.

## | Usage |

- Please immediately remove water, oil, and sand from the surface, as they can cause slips. Elderly people and pregnant women, in particular, should exercise caution.
- The product is very heavy, so care must be taken during transport. Overloading can not only damage the product, but cause injuries or damage to property.
- Please start installation only after fully understanding the manual
- This product should be used only as a flooring material.

# I-Badak is moving forward with our best efforts to develop world-class flooring materials.

These efforts offer I-Badak customers even greater possibilities.

Since our establishment, we at I-Badak have distinguished ourselves as rubber floor specialists who push ahead in the research and development of processes and products related to rubber flooring materials.

I-Badak Floor Soft is an eco-friendly flooring material that is superior in durability, sound absorption, and slip protection, the very qualities required for flooring materials. It does not emit the environmentally harmful substance formaldehyde.

In addition, the product's cushioning feel, unique to rubber, will minimize foot fatigue even during long hours of standing or walking.

I-Badak is growing as a company that takes the lead in product development, doing our utmost to become a company that is truly loved by our clients.

We are going to take each step forward on this journey together with our customers.
